-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over SU 1669552 in view of SU 1090447. SU '552 discloses a closed loop grinding scheme with a control system and sample removal at 6 which is after the primary grinding stage. The pulp is properly analyzed at 7 with the results sent to a computer 9 which in turn adjusts the reagent input via controller 19 with feed inputs 10,11. SU '552 fails to disclose a two stage grinding circuit. SU 1090447 discloses the known use of a two stage grinding circuit with control. A two stage grind is a known alternative to the single stage closed circuit grinding with the two stage typically costing more but resulting in higher throughputs than the single stage closed circuit grinding with a size separator employed by SU '552. To substitute the known equivalent two stage grinder of SU '447 for the single stage closed

circuit grind of SU '552 would have been obvious to one of ordinary skill in the art that desires a higher throughput.
